

E- LEARNING WEBSITE **AUDITING AND DIGITAL** **MARKETING IMPLEMENTATION**

INTRODUCTION

The E-learning industry has grown rapidly due to the increasing demand for online education and skill development. A successful E-learning website should provide a smooth user experience, engaging content, strong SEO performance, and effective digital marketing strategies. In this project, an audit and digital marketing implementation plan has been created for an E-learning website performance, user engagement, Search engine visibility, and conversion rates.

For this project, the selected E-learning website is Coursera. The project focuses on website auditing, redesign planning, SEO optimization, content marketing, paid advertising, social media promotion, and reporting.

WEBSITE OVERVIEW

WEBSITE NAME: COURSERA

**INDUSTRY: E-LEARNING/
ONLINE EDUCATION**

SERVICES OFFERED:

Online courses

Professional certificate

Degree programs

Skill development courses

Career training

TARGET AUDIENCE:

Students

Working professionals

Job seekers

Entrepreneurs

WEBSITE AUDIT (ON-PAGE SEO ANALYSIS)

STRENGTHS OF THE WEBSITE

User friendly interface

High quality educational content

Fast loading speed

Strong brand reputation

WEAKNESSES OF THE WEBSITE

Some pages contain lengthy content with low readability

Limited internal linking on certain course pages

Duplicate meta description on some pages

Blog section needs more updated content

On-Page SEO Audit

Title Tags

Most pages have proper title tags.

Some titles are too long and exceed SEO limits.

Meta Descriptions

Meta descriptions are available but need better keyword optimisation.

URL Structure

URLs are clean and SEO friendly.

Heading Structure

Proper use of H1, H2, and H3 headings.

Some pages contain multiple H1 tags.

Keyword Usage

Primary keywords are used effectively.

Secondary keywords can be improved.

Image Optimisation

Alt text missing on some images.

Large image sizes affect loading speed.

Internal Linking

Improvement needed for better navigation and SEO authority.

Technical SEO Audit

Website Speed

Website speed is good but can be improved through image compression and caching.

Mobile Friendliness

Fully mobile responsive.

HTTPS Security

Secure website with SSL certificate.

Sitemap

XML sitemap available.

Broken Links

Few broken links found in blog pages.

Redesign Plan

Objective of Redesign

The redesign aims to improve:

User experience

Website navigation

Conversion rate

Mobile usability

Content engagement

Proposed Website Improvements

Homepage Improvements

Add clear call-to-action buttons

Improve banner design

Highlight trending courses

Navigation Improvements

Simplify menu structure

Add category-based navigation

Conclusion

The E-learning Website Auditing and Digital Marketing Implementation project focuses on improving the performance of an e-learning platform through website optimisation and digital marketing strategies. By

implementing SEO techniques, content marketing, social media promotion, and paid advertising campaigns, the website can achieve better visibility, higher engagement, and increased conversions.

This project also provides practical knowledge about website auditing, SEO, analytics, and digital marketing implementation, which are important skills in the modern digital industry.
